

FAIZAN - PERSONAL KNOWLEDGE BASE

Introduction

My name is Faizan.

I am an AI Engineer who enjoys building intelligent applications, AI assistants, RAG systems, AI agents, and backend services using modern technologies. I am passionate about Artificial Intelligence and continuously work on improving my skills by learning new tools and building real-world projects.

My goal is to create practical AI solutions that help people and businesses solve problems efficiently.

Personal Information

Full Name

Faizan

Profession

AI Engineer

Email Address

gamewithfaixu@gmail.com

Phone Number

7889429723

About Me

I am an AI Engineer with a strong interest in Artificial Intelligence, Large Language Models, Retrieval-Augmented Generation (RAG), AI Agents, and Backend Development.

I enjoy experimenting with new technologies and transforming ideas into working applications.

I believe in continuous learning and practical implementation. Most of my time is spent learning, coding, testing AI systems, and improving existing projects.

My Skills

Programming

- Python

Backend Development

- FastAPI
- REST APIs
- API Integration

Artificial Intelligence

- AI Agents
- LangChain
- Prompt Engineering
- RAG Systems
- Conversational AI
- LLM Applications

Vector Databases

- FAISS
- Semantic Search
- Embeddings
- Knowledge Retrieval

Development Tools

- Git
- Streamlit
- Hugging Face Models

What I Do

I create intelligent software systems powered by Artificial Intelligence.

My work includes:

- AI Chatbots
- Personal AI Assistants

- RAG Applications
 - PDF Question Answering Systems
 - AI Agents
 - Knowledge Base Systems
 - FastAPI Applications
 - Automation Tools
-

Services

Basic Chatbot

Price: \$4

A simple chatbot capable of handling basic conversations and answering predefined questions.

RAG-Based Chatbot

Price: \$8

A chatbot connected to documents and a vector database that retrieves information before generating responses.

Advanced AI Agent

Price: \$15

A more advanced assistant capable of retrieval, reasoning, task execution, and automation.

My Development Process

When building AI applications, I generally follow these steps:

1. Understand requirements.
2. Collect knowledge and data.
3. Process documents.
4. Generate embeddings.
5. Create vector databases.
6. Build retrieval systems.
7. Connect the language model.

8. Test the application.
 9. Improve response quality.
 10. Deploy the final solution.
-

Technologies I Use

- Python
 - FastAPI
 - LangChain
 - FAISS
 - Streamlit
 - Hugging Face Embeddings
 - Large Language Models
 - Vector Databases
 - Retrieval Systems
-

Professional Interests

I am interested in:

- Artificial Intelligence
 - AI Agents
 - Machine Learning
 - Automation
 - Software Development
 - Emerging Technologies
 - Intelligent Systems
-

Hobbies

Outside of technology, I enjoy:

- Cricket
 - Volleyball
 - Watching Korean Dramas
 - Watching Web Series
 - Exploring New Technologies
-

Personality

I am generally known as:

- Friendly
- Helpful
- Curious
- Creative
- Hardworking
- Self-Learner
- Problem Solver

I enjoy learning new concepts and turning ideas into useful products.

Frequently Asked Questions

Who is Faizan?

Faizan is an AI Engineer who builds AI-powered applications, RAG systems, AI assistants, and automation tools.

What does Faizan do?

Faizan develops intelligent software systems using Artificial Intelligence and modern development technologies.

What are Faizan's main skills?

Python, FastAPI, AI Agents, LangChain, RAG Systems, Prompt Engineering, Vector Databases, and Backend Development.

Does Faizan build chatbots?

Yes. Building AI chatbots is one of Faizan's primary services.

Does Faizan build RAG systems?

Yes. RAG development is one of Faizan's core specialties.

Does Faizan use FastAPI?

Yes. FastAPI is one of the main backend frameworks used by Faizan.

What services does Faizan offer?

Basic Chatbots, RAG Chatbots, Advanced AI Agents, AI Assistants, and Knowledge-Based Applications.

How can I contact Faizan?

Email: gamewithfaixu@gmail.com

Phone: 7889429723

What are Faizan's hobbies?

Cricket, Volleyball, Korean Dramas, Web Series, and Technology.

What is Faizan's goal?

Faizan aims to build advanced AI agents, intelligent automation systems, and scalable AI-powered products that provide real value to users.

Final Summary

Faizan is an AI Engineer focused on building practical AI solutions. His interests include AI Agents, RAG Systems, FastAPI Development, Knowledge Retrieval, and Automation. He enjoys learning new technologies, building innovative projects, and helping people through intelligent software solutions.
